CWO 720X (DIVING OFFICER)

DESIGNATOR DESCRIPTION

(Diving Officers) Serve as technical experts who lead complex peace time and combat related diving missions. They oversea Underwater Ship's Husbandry (UWSH), salvage, special warfare, and undersea research and development missions/units. They utilize significant operational and technical experience to safely execute "High Risk" diving, salvage and repair work according to established procedural guidance. As Command Diving Officers and Division Officers/Heads they manage all administrative facets of the command's diving program. As qualified Watch Station Diving Officers they provide critical on site Operation Risk Management (ORM), ensure verbatim procedural compliance, and maintain clear Command, Communication and Control throughout the entire diving operation. On Staff duty they act as the principle advisor to Fleet Staff for execution of emergent and routine salvage, repair, oil spill, OPLANS and Combat Harbor Clearance operations. They are heavily versed in the principles of ORM, surface and submarine repair, QA, salvage, underwater demolition, and operating in an expeditionary warfare environment.
